

Zoom

The Zoom extension improves navigation and provides additional functionality to SAP's already powerful toolkit.

The Zoom tool provides the user the ability to optimize navigation automatically while filling in key fields.

Zoom provides:

- The ability to jump from any field to most other fields.
- While skipping prompts, default these values on the way to the default destination

Go Green. Go Paperless.

Zoom

Zoom Professional

Zoom Advanced provides additional functionality, allows for more defaults and the ability to call Pop-up screens.

- Defaults can be database driven
- Defaults can be formulas
- Pop-up screens
- Pop-up change tracking
- Allows jumping to ANY field

Current & Future Zoom Processors

For even more functions additional processors can be plugged into Zoom. These processors can be added à la carte.

Screen Painter Processor

One example of the processors, the SPP (Screen Painter Processor) can be seen below. The SPP allows using the SAP Screen Painter to generate complete data input screens that can be popped from anywhere in SAP Business One.
