Intelliprint

The Intelliprint extension automates the process for parts received into stock and sends immediate alerts to the appropriate people, reducing labor and time.

When parts are received, Intelliprint recognizes which items to hold and which items are in demand. Below are examples of reports printed using Intelliprint when items received into stock.

```
-------------------------------------
Parts With Demand
-------------------------------------

Item Number: A00002
Sales Order: None
Customer PO: None
Production Location: N/A

***      Open Sales Orders      ***
SO#    Line#    Description     Qty
3053   1        Open            1
3122   1        Open            1
3152   1        Open            15
3003   2        Open            10
3018   2        Open            1
3019   1        Open            1

```

If no action is needed, a document will be printed to hold the parts in staging, and an alert will be sent to the appropriate decision maker.

Go Green.
Go Paperless.
