PO Movement

The PO Movement extension allows Suppliers to easily track materials in transit as well as in receiving inspection.

The illustrations below provide a brief description of how the PO Movement extension works.

Receiving Inspection

Begin transfer by entering the Container Number or Purchase Order Number

Entering the Container Number or Purchase Order Number automatically brings in all parts instead of keying in manually

Stock

Through integration and automation, keypunches are minimized reducing opportunities for error as well as saving both money and time.
