

Sourcing Processor

The Sourcing Processor extension allows for the organization and tracking of Supplier or factory information including multiple quantity breaks, pricing, and flat charges.

The illustration below highlights the key features of the Sourcing Processor extension.

The screenshot shows the Sourcing Processor interface with several callout boxes:

- Quantity/Price breaks can be easily created and adjusted.** (Points to the 'Option # / Print' and 'Quantity' fields)
- Comments Box provides unlimited space to store additional information for each option.** (Points to the 'Comments' field)
- Auto-generate Purchase Orders** (Points to the 'Process PO's' button)
- Displays P/N Description or Decoration Location** (Points to the 'P/N Desc or Decoration Loc' column)
- Calculate sell price based on gross percent margin** (Points to the 'Gross Margin %' field)
- SAGE Database integration** (Points to the 'SAGE Data' button)
- Supplier Artwork is displayed and easily accessible through the image link** (Points to the 'Image Link' column)
