

Sourcing Processor

The Sourcing Processor extension allows for the organization and tracking of Supplier or factory information including multiple quantity breaks, pricing, and flat charges.

The illustration below highlights the key features of the Sourcing Processor extension.

The screenshot shows the SAP Sourcing Processor interface. At the top, there are tabs for 'Comments', 'Stock', and six 'Other Charge Opt.' tabs. Below these are fields for 'Charge Description', 'Charge Amounts', and 'Comments'. A table below shows 'Option # / Print' and 'Quantity' for options 1 through 6. The main table lists suppliers with columns for '#', 'Supp #', 'Supplier Name', 'P/N/Ch#', 'Sup/P/N/Decoration', 'P/N Desc or Decoration Loc', 'Image Link', 'Price 1' through 'Price 6', 'Lead', 'Select', 'PO #', and 'Status'. Callout boxes point to various features: 'Quantity/Price breaks can be easily created and adjusted.' points to the 'Option # / Print' table; 'Comments Box provides unlimited space to store additional information for each option.' points to the 'Comments' tab; 'Auto-generate Purchase Orders' points to the 'Process PO's' button; 'Displays P/N Description or Decoration Location' points to the 'Sup/P/N/Decoration' column; 'Calculate sell price based on gross percent margin' points to the 'Gross Margin %' field; 'SAGE Database integration' points to the 'SAGE Data' button; and 'Supplier Artwork is displayed and easily accessible through the image link' points to the 'Image Link' column.

- Track vendor P/N
- Capture extra charge
- Source stock or drop ships
- Easy color entry
- Size entry based on availability
